

SUPPLEMENT FOR PASTPARTUM DAIRY COWS

INTENDED USE: Dairy cows in pastpartum period may suffer subclinical hypocalcemia, displaced abomasum, milk fever, high liver fat, ketosis, mastitis and metritis. All these condirions may decrease reproductive and lactational performance of cows. PORTACURE LOPHOL may decrease the risk of mammary and uterus infections with its high vitamin and mineral contents by supporting immun system of cows. Minerals contents (e.g. Ca, Mg) playing important role in calcium metabolism may prevent subclinical hypocalcemia, and glucogenic material (e.g. Propionate) may increase blood glucose level and may decrease extensive fat mobilisation and decrease fatty liver and ketosis risk beside improvement in reproductive performance.

USAGE: 1 kg Portacure Lohpol could be solved in 10-15 L water and supplied to newly freshened cow daily. It could be used in small ruminant 1-2 L by keeping suggested concentration as well.

INGREDIENTS: 3a700 Vitamin E %0,2 (*Alfa Tokoferol Asetat*), 3a821 Vitamin B1 % 5×10^{-2} (*Tiamin%98*), E101 Vitamin B2 % 2×10^{-2} (*Riboflavin %80*), 3a314 Vitamin B3⁻¹ % 12×10^{-2} (*Niacin %99*), 3a831 Vitamin B6 % $2,5 \times 10^{-2}$ (*Pridoksin %98,5*), E508 Potasyum Klorür %10 (*Potassium Monochloride %97*), E518 Magnezyum Sülfat %10 (*Magnesium sulfate %12*), 11.4.1 Sodyum Klorür %5 (*Sodium chloride %96*). **Carriers:** E282 Kalsiyum Propiyonat (*Calcium propionate%97*).
