POSTPARTUM SUPPORT PREMIX FOR COWS

INTENDED USE: The risk of metabolic problems such as subclinical hypocalcemia, displacement, metritis, mastitis, fatty liver and ketosis is high in Post-partum Cows. The decrease in yield together with these problems is observed. The taking precautions that would reduce these problems, the metabolic risks that would appear after birth will be decreased and contribute to the protection and improvement of reproductive and lactation performance. With vitamins and minerals in its content, PORTACURE LOHPOL supports the immune system by reducing the risk of uterus and breast infections. Calcium and subclinical calcium reduces the risk of paralysis at birth. It contributes to keep at a certain level the blood glucose with the glucogenic substance in its content, it reduces the fat mobilization of body, the risk of fatty liver and ketosis. It enhance reproductive performance.

USAGE: For large ruminants which gave birth newly; it is used by being dissolved 1kg Portacure Lohpol in 10-15L of warm water.
For small ruminants, it is given 1-2 liters of this solution.

COMPOSITION:

Vitamins / Nutritional additives

3a700 Vitamin E (Alpha Tocopherol Acetate) 0,2 %; 3a821 Vitamin B1 (Thiamine) 5×10^{-2} %; E101 Vitamin B2 (Riboflavin) 2×10^{-2} %; 3a314 Vitamin B3(Niacin) 12×10^{-1} %; 3a831 Vitamin B6 (Pyridoxine) $2,5 \times 10^{-2}$ %.

Macro Minerals / Nutritional additives

E508 Potassium chloride 10 %; E518 Magnesium sulphate 10 %
11.4.1 Sodium chloride 5 %.

Carriers

E282 Calcium propionate.
