RUMEN REGULATORY PREMIX

INTENDED USE: It is used to meet the mineral substance needs of ruminant (cow, heifer, calf, sheep, goat, lamb, kid) animals. It is used as a rumen flora regulator due to acidosis of ruminant animals. It helps to regulate rumen pH. Thanks to the dried yeast culture in its content, it is a ready food for the cellulotic bacteria in the rumen and helps to increase the population.

USAGE: It is used by being mixed to the daily feed and water of animals.

Cattle: 50-150g

Calf: 20-100g

Sheep-Goat: 15-50g

Lamb-Kid: 10-25g
