## PREMIX ENRICHED WITH AMINOACID, ANIONIC SALT AND YEAST FOR SMALL RUMINANTS

**INTENDED USE:** It is used to meet the vitamin and mineral needs of small ruminants. It prevents urinary stone that occurs in small ruminants. It increases the live weight and carcass yield of fattening lamb. If it is used for sheep, before and after the mating of sheep, it increases the twin possibility. It prohibits problems such as licking wall, eating soil etc. Thanks to the yeast and rumen regulator in its content, it regulates rumen and intestinal microflora and also enhances the utilization of the feed.

**USAGE:** It is used by being mixed to the daily feed of animals.  
(per animal)
