

Farmixir

FARM SPECIAL PREMIX

By visiting you, our precious customers' feedlots, with our technical experts who have honourable feeding and management knowledge, we evaluate all the vital activities necessary for animals.

While doing this depending on data such as;

- Blood Analysis
- Feces Analysis
- Feed Analysis (coarse fodder/ concentrated feed)
- Nutrient Analysis
- Aflatoxin Analysis (antinitritrional factors)
- Feedlot Status Analysis

We make a general profile of the feedlot. We make suggestions according to available productivity reports and business's problem ranking priorities. By formulating the nutritional requirements specific to the feedlot, we offer our products, which are produced with high technology, to you, our valuable farmers.
