MACRO DECK

VITAMINS PREMIX FOR POULTRY, SMALL AND LARGE RUMINANTS

INTENDED USE :

It is used to meet the needs of essential and fat soluble vitamins and support immune system and cell growth. With its vitamin C content, it helps to increase feed consumption and reduce heat stress and keep animals healthy by supporting immune system. Vitamin D3 in its content aids in the absorption of calcium, helping to form and maintain strong bones. As for Vitamin E, it acts as an antioxidant like Vitamin C, helping to protect cells from the damage caused by free radicals. Vitamin K3 is also important for bone metabolism.

USAGE :

It is used by being mixed 1 ml into 10 liters of drinking water for poultry and 75 ml into 1.000 liters of drinking water for large ruminants and 150 ml into 1.000 liters of drinking water for small ruminants.
